PURCHASE

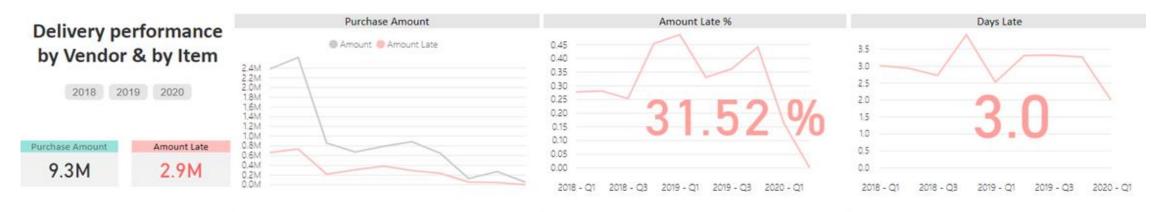

Purchase cube comes with 84 measures organized in seven measure groups:

Purchase Values: Analyze the cost of Items, GL postings (services), Charges and Fixed Assets (Cost amount, Discount, Quantity, Price, Last purchase transactions) from standard invoiced transactions as well as from specific NAV information like Cost Amount Expected.

Purchase Orders. Analyze purchase documents (Quote, Order, Blanket Order, Return order, Invoice, and Credit memo) by any measure or dimension available in Purchase Header or Purchase Line.

Purchase Order Archive: Analyze archive of purchase documents long after these have been changed, posted or deleted (standard BC functionality to track all changes) by any measure or dimension available in Purchase Order Archive or Purchase Line Archive, additionally to Last archive in a day and Last archive in a month. With simple change in BC you can analyze also orders which are posted immediately after creation. Very useful for companies with long delivery cycles.

MANUFACTURING

Manufacturing cube comes with 36 measures organized in four measure groups:

Manufacturing: Analyze Input, Output and Work-in-progress of quantities and values across items and capacities. Get answer to questions from output perspective "how have been produced products over time" or from input perspective "where – in which items – has been consumed a material or capacity" for possible cost control or product recall.

Manufacturing Expected: Compare expected values (before starting Production Order) with actuals and for costs and quantities at any level of production process and improve production BOM.

Capacity Calendar: Analyze capacity, actuals and variance of Work Centers (people, machines) group by any BC attribute.

Capacity Times: Run, Setup and Stop Time, also available as percentage.

Measure groups are sharing **19 dimensions** with **166 attributes** in **21 hierarchies**.

PROJECTS

Analyzing Jobs requires flexibility on details. Job cube comes with **249 measures** organized in three measure groups:

Job Actual: track Sales (Net, Gross, Discounts, Profits) and Hours with Actual and Expected values with details related to Item, GL, and Resource.

Job Planning: compare Scheduled and Contracted measures and compare it with Actuals as absolute or relative numbers (% Complete and % Contracted).

Measure groups are sharing **10 dimensions** with **99 attributes** in **17 hierarchies**.
